

Company Profile

Saharay Al Jazeera Tents Est.

- Excellence in Car parking Shades For Commercial and Residential premises as well as Custom Designs

About Our Company

Over a Decade of Engineering Excellence & Innovation

Founded in 2013, our company has built a strong reputation as a trusted specialist in **Car Parking shades** and customized shade solutions. With years of industry experience, we deliver structures that combine strength, functionality, and visual appeal.

We are supported by an excellent, hardworking, and highly skilled team that is committed to precision at every stage of the project. From design to installation, we focus on quality execution and timely delivery, consistently completing projects before the committed deadlines while maintaining competitive pricing.

We believe in "**Quality without Compromise.**" We provide world-class shading solutions at a highly **Competitive cost**.

Our relationship doesn't end at installation. We offer comprehensive **After-Construction Services** and maintenance to ensure your structures remain in pristine condition.

Our Expertise

- **Cantilever Car Parking Shades**
- **Tensile Fabric Car Parking Shades**
- **Arch Car Parking Shades**
- **Column Supported Car Parking Shade**
- **Pyramid Car Parking Shade**
- **Custom Store and Household Car parking shades**
- **Pergola Shades**
- **Sail Shades for parks and play areas**
- **Traditional Arabic Shades**

Our success is driven by hardworking and exceptionally talented team of engineers and craftsmen who treat every project as a masterpiece.

Why Choose Us

We use only premium, high-grade materials such as **HDPE fabric, PVDF/PTFE** tensile membranes, and robust steel/aluminium frames engineered to withstand harsh weather conditions, including high winds, intense UV exposure, and extreme temperatures. Our shades offer up to **99% UV protection** and are built to last for decades with minimal maintenance.

With years of experience and hundreds of successful installations, our clients consistently praise our reliability, attention to detail, and outstanding results. We stand behind our work with comprehensive warranties and dedicated support.

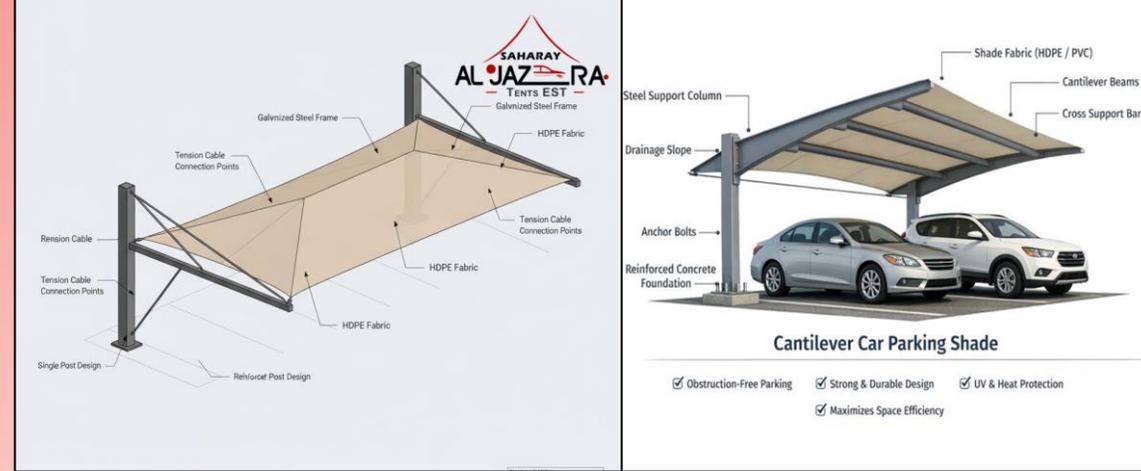

We have expertise of **13+** years and **800+** successfully Completed Projects.

Following are the Details of Our Projects

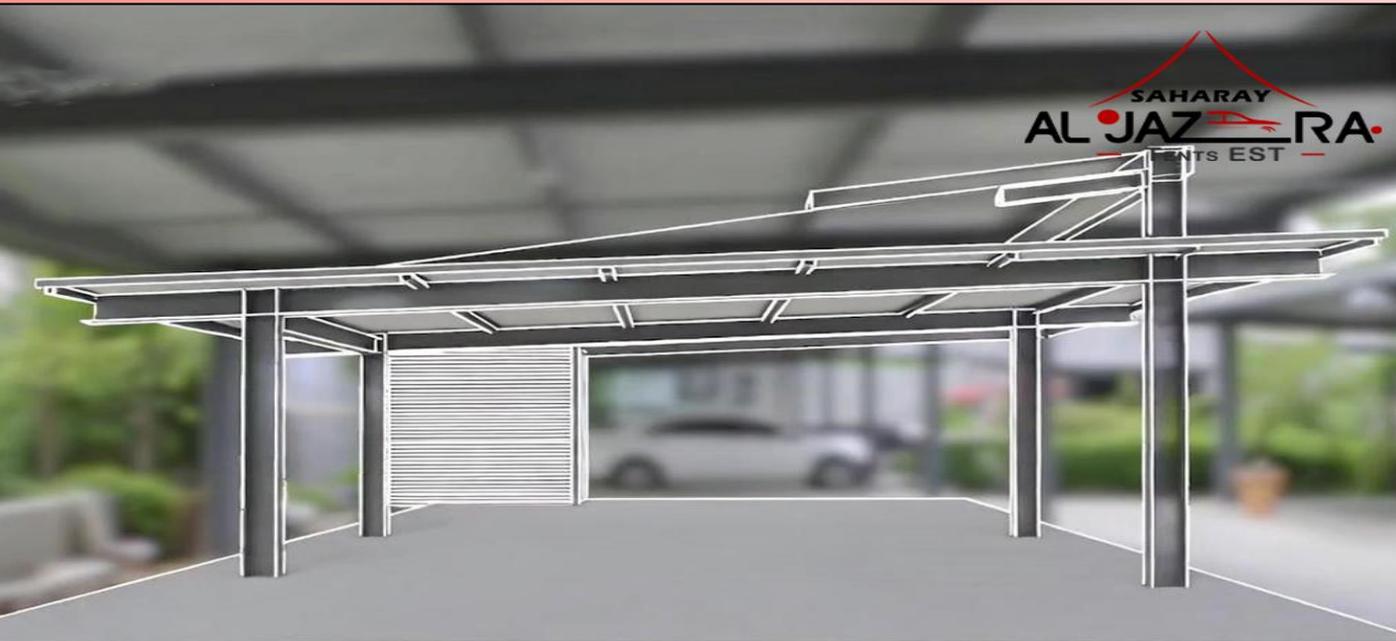

Cantilever Car Parking Shade

Cantilever shades are one of our most popular and recommended solutions for clients seeking a perfect balance of functionality, space efficiency, and contemporary aesthetics. Unlike traditional four-post or central-column structures, cantilever designs feature support columns positioned on one side only, creating an open, unobstructed parking area underneath. Their sleek, minimalist profile enhances property value and modern appeal, making them an ideal choice for clients

FROM DRAWING TO EXECUTION

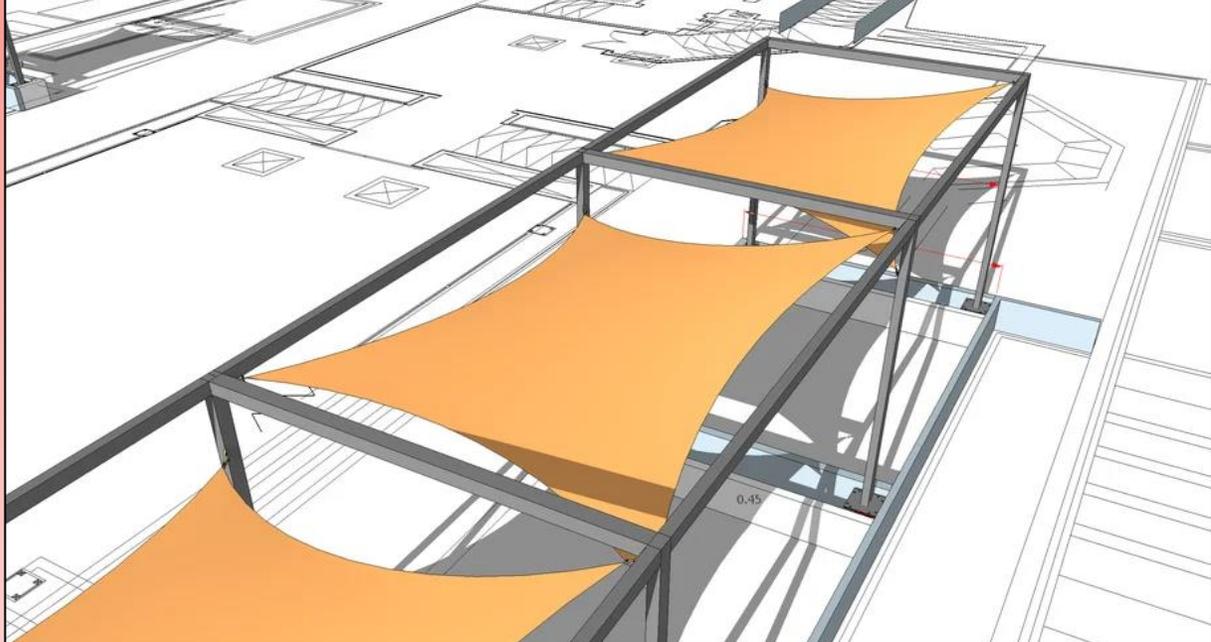

KEY BENEFITS

Tensile Fabric Car Parking Shade

Tensile Fabric Shades are the pinnacle of modern shading technology. Unlike traditional rigid roofs, these structures use high-tension architectural membranes supported by a robust steel frame. This allows for large, clear spans and unique, flowing shapes that provide maximum coverage with minimal structural interference. The smooth surface of the fabric is often "self-cleaning" (dirt washes away with rain) and is resistant to flame, Mold and pollutants. High-performance membranes block 90-99% UV rays while allowing diffused natural light, keeping cars cooler in diverse climates.

- Tensile fabric car parking shades are **modern architectural shade structures** designed to provide effective vehicle protection while enhancing the visual appeal of any space.
- These structures use **high-strength, tensioned fabric membranes** supported by engineered steel frames and cables.

TENSILE FABRIC PARKING SHADES

- UV Protection**
Blocks Harmful UV Rays
- Weather Resistant**
Withstands Sun & Rain
- Cost Effective**
Affordable & Durable
- Modern & Stylish**
Enhances Aesthetic Appeal
- Cooler Environment**
Keeps Cars Cooler
- Maximizes Space**
Optimizes Parking Area

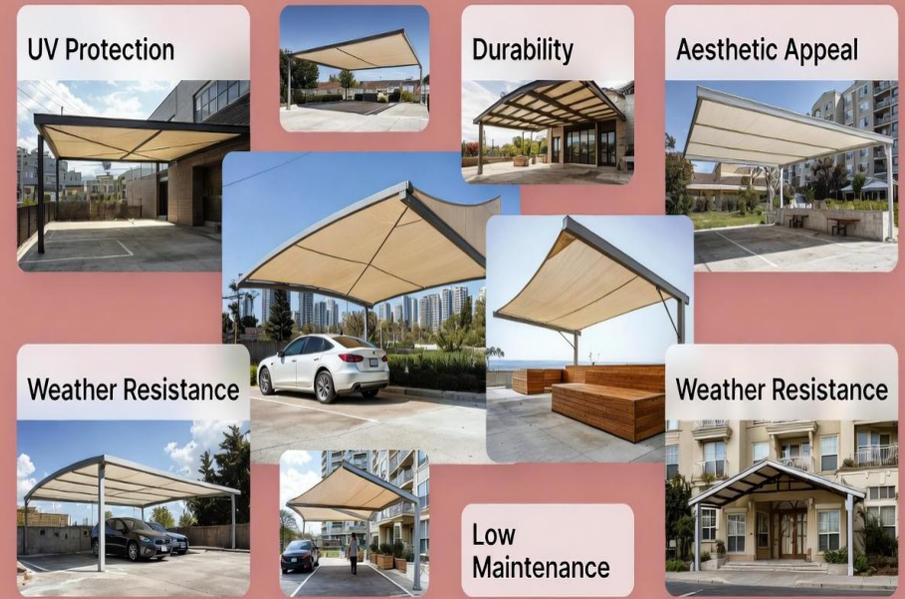

Arch Car Parking Shade

Arch car parking shades feature a sleek, curved design that combines strength, elegance, and high performance. Built with robust steel arches and premium tensile or PVC fabric, these shades provide reliable protection for vehicles against harsh sunlight, heat, rain, and dust. The arched structure allows efficient water drainage and excellent wind resistance, making it ideal for both residential and commercial parking areas.

Why Choose Arch Car Parking Shades?

We choose arch designs over traditional flat or cantilever shades because they offer a perfect blend of style, durability, and performance. The curved architecture elevates the visual appeal of any residential, commercial, or public parking area, turning a simple parking space into a sophisticated feature.

Key Benefits:

- Superior Protection from harsh weather
- Aesthetic Look with Strong Foundations
- Engineered to design with strong winds and heavy rain
- Promotes natural ventilation to keep vehicles cool
- Low maintenance and quick installation

Column Supported Shade

BENEFITS:

- UV Protection
- Temperature Regulation
- Energy Savings
- Extended Outdoor Comfort
- Aesthetic Appeal

USES:

STRUCTURE:

- Column Supports (Concrete/Steel)
- Walkways & Perges
- Carports
- Public Spaces (Parks, /Plazas)
- Commercial Facades
- Foundation

Column-Supported Shade Systems: Durable & Functional Outdoor Solutions

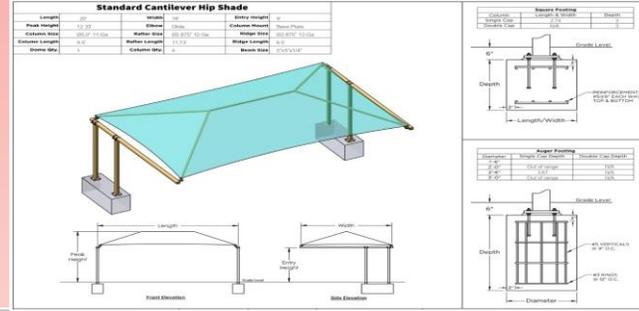

PROJECT:	ECO-SHADE DESIGN
DRAWN BY:	AI ARCHITECT
DATE:	2023-10-26

Column Supported shades are robust shade structures designed with vertical steel columns that firmly anchor the system to the ground. The roof covering is usually made from high-quality tensile fabric, PVC, or metal sheets, supported by beams connected to the columns. This design ensures excellent load distribution, making the structure highly stable and durable for long-term outdoor use. Column supported shades are widely used where strength, wide coverage, and cost efficiency are required.

Key Benefits:

- **High Structural Strength:** Vertical columns provide strong support, making the shades suitable for large spans and heavy-duty use.
- **Excellent Weather Protection:** Protects vehicles and people from harsh sunlight, heat, rain, and dust.
- **Cost-Effective Solution:** Simpler structure compared to cantilever systems, resulting in lower fabrication and installation costs.
- **ong Service Life:** Made with galvanized steel and durable fabric, offering corrosion resistance and low maintenance.
- **Design Flexibility:** Available in flat, curved, arch, or pyramid styles to match different architectural needs.

Examples of Column Supported Parking Shades

Pyramid Car Parking Shade

Pyramid Car Parking Shades feature a distinctive pyramidal or conical roof design, often crafted from high-tensile fabric (PVC, PVDF, or PTFE) stretched over a central pole or multiple supports, creating an inverted pyramid shape. This innovative tensile membrane structure provides expansive coverage with minimal supports, offering a bold, geometric aesthetic that stands out in any environment.

Key Benefits:

- **Iconic Aesthetic Appeal:** The sharp, modern pyramid shape adds a premium, architectural look, enhancing property visuals and creating a landmark feature.
- **Space-Efficient Structure:** Fewer supports mean more parking spots in the same area and easier vehicle access.
- **Durability in Extreme Conditions:** Engineered for high wind loads (up to 150 km/h) and long lifespan with low maintenance.
- **Customizable & Eco-Friendly:** Available in various sizes, colors, and configurations; lightweight materials reduce foundation needs.

DRAWINGS

The 3D drawing typically shows vertical columns fixed to concrete foundations, horizontal or curved beams, and a stretched fabric roof, giving a clear visual understanding of the structure, spacing, height, and overall coverage. These drawings are ideal for presentations, proposals, and client approvals.

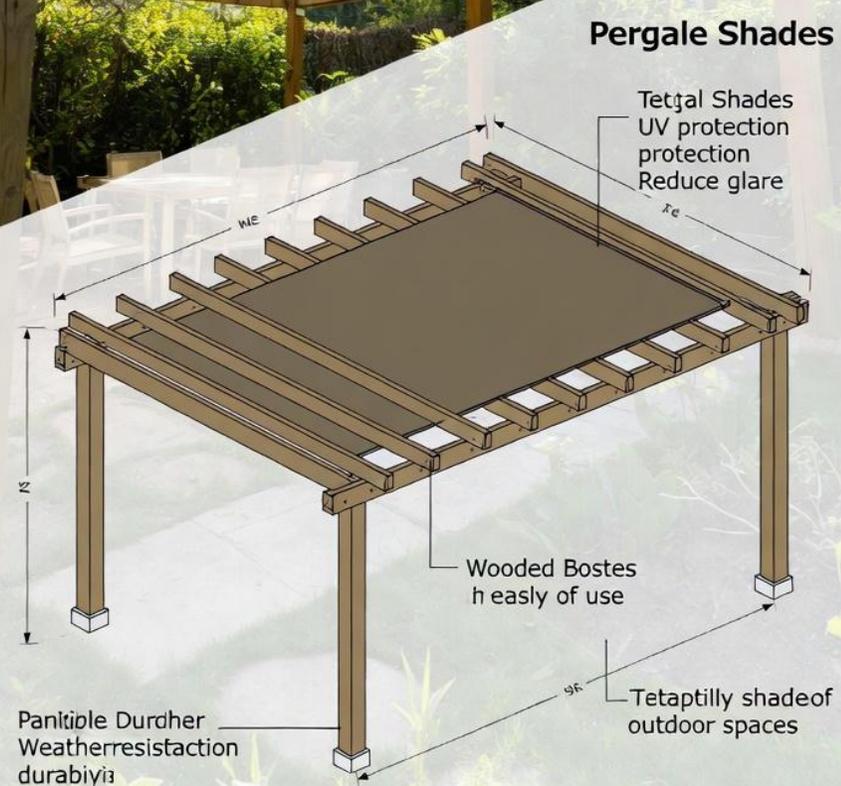

USES

- Car parking areas for offices, malls, hospitals, and residential compounds
- Industrial facilities and warehouses
- Schools, universities, and public buildings
- Walkways, waiting areas, and outdoor seating zones

Pergola Shades

Pergola Car Parking Shades are open lattice-style structures inspired by traditional garden pergolas, adapted for vehicle protection. They feature a framework of vertical posts supporting cross beams and rafters, often topped with slatted roofing, retractable fabric canopies, climbing plants, or shade cloth. This design provides partial to full shade while allowing filtered sunlight and excellent airflow, creating a charming, garden-like parking area.

Key Benefits:

- Natural Aesthetic Appeal
- Filtered Shade & Ventilation
- Customizable Protection
- Durability & Low Maintenance
- Eco-Friendly & Cost-Effective
- Versatile Use

Structural Details

- Materials: Pressure-treated timber, cedar/aluminum/steel frames.
- Foundation: Concrete footings or anchors for stability.
- Load Capacity: Designed for wind (up to 120 km/h)
- Roof Options: Fixed slats (50-70% shade)

Uses

Pergola shades are versatile outdoor structures designed to provide shade while enhancing the beauty of open spaces. Their elegant framework and flexible roofing options make them suitable for both residential and commercial environments.

Pergola shades not only protect from sunlight and light rain but also add a stylish architectural element, making outdoor spaces more functional, comfortable, and visually appealing.

MEET OUR TEAM MEMBERS

Chairman and Founder
Mr. Bashir Ahmad

Mr. Bashir Ahmad Under his visionary leadership of our respected Chairman of Saharay Al Jazeera Tents Est. has grown into a trusted name in quality tent manufacturing and innovative event solutions across the region.

CEO and General Manager
Mr. Abdullah Bashir

Mr. Abdullah Bashir Our Young blood and Visionary leader driving innovation, growth, and long-term strategy with a strong commitment to quality and excellence. Our company start exponential growth under his leadership

MEET OUR TEAM MEMBERS

Shahid our company's foreman who supervises all the operations during construction and help the team to communicate smoothly. He plays important role to complete the operations before deadline and comply with all the safety cautions.

Ahmad a foundation making specialist carefully excavates, levels, and prepares the site before pouring reinforced concrete footings or pile foundations designed to support the heavy steel frame and fabric shade structure.

Muzman a skilled welder as well as skilled hand on steel columns fitting and finishing. He also oversaw fabrication process. elivers strong, reliable structures by combining technical welding skills with accurate steel installation.

Arfan a skilled fabric installer carefully stretches and tensions high-quality shade fabric (usually HDPE) over the steel framework Using specialized tools, ladders and safety gear.

MEET OUR TEAM MEMBERS

Faisal is a highly skilled fabric fitter with deep knowledge of tensile shade systems. He understands steel structures, load balance, and correct fabric tensioning techniques. He is very hardworking and always keen to learn new skills.

Adnan demonstrates exceptional precision in tensioning and securing fabric, ensuring a seamless, drum-tight finish on every steel structure. His deep understanding of structural alignment allows him to fit complex shade designs with unmatched speed and technical accuracy.

Mudassir is a skilled worker who fits tensile fabric onto steel parking shades structure precisely and with exceptional skill and experience, he ensures perfect tension strength and longterm durability. He is dedicated worker.

Ahad Munir is a sales and marketing expert who primarily runs company's marketing campaign and communicate with our clients before and during construction process to ensure clients satisfaction. Customer satisfaction is out core value.

Why we are different:

- We provide you with an in-house engineering and design team.
- Global Reputation, Local Expertise; operating in Saudia Arabia for over 23 years
- A Commitment to Quality, Safety and the Environment; ISO certification ISO 9001, ISO 14001, ISO 45001.
